Infinite Overview

Infinite, born in 2009 with a mission to bring people and computers together successfully, is among largest IT training provider in Rajasthan; Infinite has trained one out of every three software professionals in the country and become a beacon in the global IT revolution. From introducing computers to the people of India, to providing advanced IT skills to students and professionals, Infinite has evolved into a training powerhouse. While our special-priced, IT programs have enabled ordinary citizens to achieve computer and Internet literacy, our career education has shaped the lives of millions of individuals.

Infinite provides a comprehensive education environment to individuals and enterprises, offers training that is customized to the varied needs of audiences with diverse backgrounds.

Infinite has played a pioneering role in taking computer learning to the masses. We train over 250 learners each year, with an alumni association. We use IT learning to change lives.

Infinite @ CDC

Infinite, with a legacy of over 3 years in the It education business, pioneers yet another initiative for extending IT education to college students within their campus in collaboration with institutions. Institutional alliances create a communication network that is both affordable and profitable to institutions.

Infinite alliances an initiative from Infinite Technologies to map engineering across India with latest technical competence to the emerging knowledge economy and help pool of youngsters to educate and have an edge in the fiercely competitive employment market in India, with this Infinite has initiated working with engineering colleges in India to invest in education and ensure employability and productivity of candidate's right from day one.

Infinite Technologies

Project Semester Overview

To offer the students real time exposure and experience in software development platform which reinforces programming concepts, assess programming skills and creative thinking. Students are given a software development kit which contains all the software, Project Synopsis, Illustration and problem at hand. Candidate has to compile and come out with the accurate code to address the problem at hand.

Students Get Customized training in .NET from Certified Instructor before the candidate is deployed onto the project. Project Mentoring from Infinite@Campus is for the Students who are looking to hone and perfect their programming skills. Here you can find several problems with real-life scenarios. Attempting these will definitely give you an edge over others.

The Solution is evaluated on:

➢ Code Accuracy - Does your solution give the expected result? How close is it to the accurate solution? Evaluation of code happens on how accurate the code is.
➢ Compliance with Standards – Your code is expected to follow commonly accepted coding conventions and standards. The less the number of deviations the more compliant your code.
➢ Code Efficiency – Is your solution the most optimal solution possible? Coding Efficiency is currently loosely approximated to the number of lines of code.

Our Proposition

Projects for B.Tech. & MCA Students - .NET & PHP

Objective

➢ To train and develop the students to make them industry ready and employable whilst offering them Quality Projects coupled with valuable inputs on the technology in the College for Real time Corporate Exposure
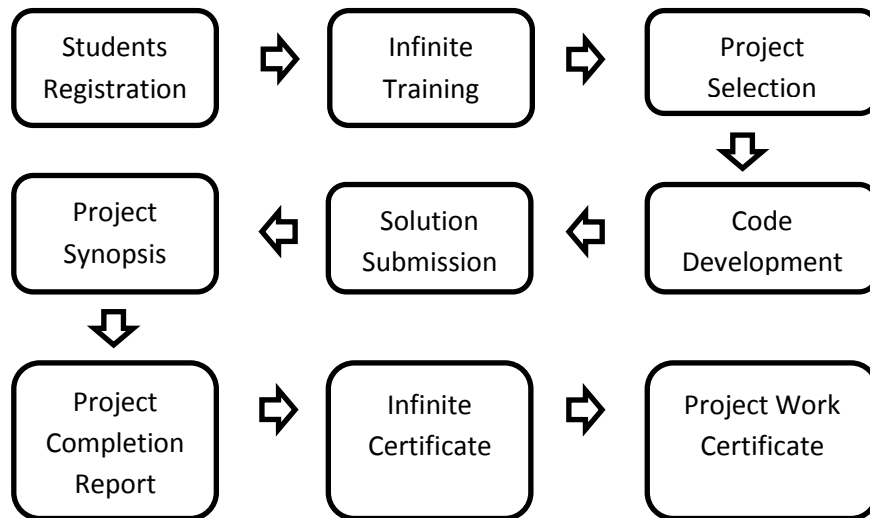

Infinite Technologies

Infinite@Campus has designed a program to offer Project training Solution to the College going Students. The Live Project is an Endeavour from Infinite to create a simulated environment of an IT organization within the College Premises.

Students gain Exposure to the real time Problem Solving and Solution Development Activities. The training Program offered through Infinite before the students start developing the solutions builds the foundation for the code writing for the solution.

Campus Project Delivery Process & Cycle

Project Cycle

Infinite Technologies

"Lohani Menage" , Plot No. 31, Rajasthan Bank Street, Bombay Motors (CH-Road), Jodhpur (Raj.)-342003
Tel: 0291-2635378, 9928952444 | info@infinitetechnologies.in | www.infinitetechnologies.in

Training Module & Program Fee

Module	Duration	Training Focus	Stream	Fee
I	40 Hrs	Window Apps - .NET(VB/C#)	B.Tech. / MCA	₹ 4000
II	60 Hrs	Web Apps – ASP.NET (VB/C#)	B.Tech./ MCA	₹ 5500
III	40 Hrs	PHP & PHP++	B.Tech./MCA	₹ 5000

Financial Terms & Conditions

A fee will be offered to the students

a. The recommended Fee Pattern is appended above.
b. Taxes like Service Tax may be applicable on fees, as mandated by governmental authorities and would need to be adhered to by all concerned.
c. The responsibility for collecting fees will be with Concerned Institution.
d. Institution will remit the Infinite Share of fees by cash/cheque/demand draft favoring Infinite Technologies, payable at Jodhpur
e. The payment will be 100% in advance.

Roles & Responsibilities of Association

Infinite Responsibilities:

➢ Provide Experienced & certified trainers.
➢ Provide Infinite (IT Company) name , goodwill & recognition.
➢ Provide Infinite official courseware.
➢ Provide domain specific resources to the students for Project completion.

Infinite Technologies

Certification

Type of Certificate:

- ➢ Infinite Certificate to all the participants for the training program upon successful completion of the program as per the specific course guidelines.
- ➢ Project Certificate after completion and submission of Projects.

Queries / Contact Details
